Hiding marks until marking is completed.

Many people have the Grades page or Gradebook closed until the final semester mark is finalised. However, students can still see marks if they have been entered in the assignment page that is specific to that assignment. To ensure that students cannot see marks until marking is completed, go to Grades, turn editing on and close the eye for that assignment. When everything is ready, return to this page and open the eye.

1. Go to Grades via the Settings block: Settings > Grades
2. Turn editing on
3. Close eye for a particular assignment, here.
